## Increase Security Presence with the Segway Personal Transporter (PT)

An officer on a Segway® PT can cover an area more than nine times larger than on foot patrol because he or she can travel 3-4 times walking speed. In this example, two officers more thoroughly cover the area typically assigned to nine officers on foot. Consider the value in officers responding to emergencies quicker - and with energy to spare.

“The Segway PT has really improved our visibility and response time – we can see what’s going on and cover more ground in less time. Plus we’re more approachable. People are less hesitant to come up and ask for assistance.”

- Lt. Richard Ricko, Maryland Transportation Authority, Baltimore/Washington Int'l Airport

### Segway Customers Getting Real Results

- An officer who made four rounds per shift at a federal bank garage is now able to cover the same surveillance area 12 times on a Segway PT.
- A national movie theater chain in high risk areas experienced a reduction in the number of incidents in some parking lots from as many as six per night to zero.
- A global logistics company reported a 2 hour foot patrol being reduced to 20 minutes
- Officers at Baltimore/Washington International Airport respond to emergency calls 3-4 times faster than on foot.
- A global telecommunications company saved \$160,000 in its first year of implementing seven Segway PTs.
- At Chicago’s O’Hare International Airport, it used to take an officer who patrolled a parking garage over an hour. Now, by using a Segway PT, the officer has cut that time in half.
- A major shopping mall in Portugal recently deployed Segway PTs and reports 1,091 miles (1,756 km) logged on each unit in the first 45 days.

### Increase Patrol Efficiency

- Versatility: indoor/outdoor, multi-terrain, crowded environments
- Visibility: elevated sightlines enables officers to see and be seen
- Speed: move up to running speed or stand still while remaining perfectly balanced
- Stealth surveillance: nearly silent operation
- Low to no maintenance costs
- Clear energy savings: \$.10/mile (.12 €/km) with car, \$.05/mile (.06 €/km) with golf cart, \$.01/mile (.01 €/km) with Segway PT

Miami, Feb. 2007
